Unit Dose Test Cup Reagent Technology

The AIA-PACK® test cup format works with every Tosoh AIA Automated Immunoassay System. Reagents are interchangeable, so laboratories with more than one Tosoh system can use the same reagents. Transition between systems is seamless, ensuring consistent results and efficient, economical operation for the laboratory.

It is very easy for a lab to add a 9 or 19 tray sorter to the instrument. The reagent's performance does not change since the analysis section of the instrument remains unchanged.

The AIA-900 requires minimal maintenance
